# Amadeus Reservations Essentials

Classroom Guide

June 2018

#### **Disclaimer**

The information contained in this document is subject to change without notice. Amadeus system enhancements, changes to functionality and procedures may require alteration from time to time. Company names used as examples in this classroom guide are for training purposes only and do not represent any commitment on their behalf. Airfares and taxes used are for demonstration purposes and may not represent current levels. Information and examples provide in this classroom guide have been reproduced with the permission of Amadeus Educational Systems and Services Sophia Antipolis France. Neither the whole nor any part of this document shall be reproduced or used for any purpose other than that it was designed for without consent of Amadeus IT Pacific PTY LTD.

Developed by: Amadeus Learning Services - Australia. Issued: Dec 2014

Edited by Amadeus East Africa. April 2015

Amadeus East Africa LTD.

## Welcome

Welcome to your Amadeus training course.

This course will provide you with training on the main functions of the Amadeus system including airline reservations and the Amadeus Fares system.

This classroom guide assumes that you have prior knowledge of travel terminology and practices.

Please feel free to ask questions and we hope you enjoy your time with us.......

## **Objectives**

At the end of this course you will be able to use the following Amadeus system functions:

Display and interpret Availability

Sell seats from an Availability

Complete a Passenger Name Record (PNR)

Use special requests to airlines for passenger requirements such as meals, seating, and frequent flyer details

Amend or Cancel PNR

Access Queues and action PNRs whilst in a Queue

Itinerary options

Display published airfares and associated rules

Price a PNR

Issue a Ticket

Void and Refund Ticket

Access other travel related information

#### Please note:

This document is a training aid only and does not include all Amadeus entries and functions.

Please refer to quick cards, help pages and the e-Support Centre for further information.

# **Module 1: Getting Started**

## This module includes the following:

Launch Amadeus Selling Platform

Sign In / Out

Smart Keys and Speed Mode

Encode / Decode

System Help

Amadeus Selling Platform Features

Calculate date and time

Timatic information

Amadeus Information System Pages

## **Launch Amadeus Selling Platform**

Select the Amadeus Selling Platform icon on your computer's desk top or via your Internet Explorer. <a href="http://amadeusvista.com">http://amadeusvista.com</a>

## **Sign In Graphic**

When the sign in screen displays:

- Type in your Agent Sign, this is your four numeric sign in code followed by your two alpha characters (this may be your initials)
- ☐ Tab to the **Duty Code** box and select your duty code (SU or GS) ☐

Add your Password

Work Areas: You can sign into up to 6 work areas, which allows you to work on more than one PNR at a time

This will take to you the Amadeus Selling Platform welcome screen.

Click on to continue

If you wish to work in the Command Page select

If you wish to work in the Graphical PNR Page select

At any time, you can navigate between the two by clicking on the appropriate tab.

## **Reset password prompt**

When you attempt to sign in with an expired password, you will get the following dialog

Click on OK, you will be taken back to the sign in popup window, type your old password and your new password in the appropriate fields.

**Note:** Multiple incorrect password attempts will result in your password being locked and you will need to contact **Customer Support** to have it unlocked. The default password is **amadeus1.** You will immediately be requested to change your password.

## **Sign In Cryptic**

#### **HE SIGN**

**HE JI** 

When the system is left idle for a period of 60 minutes, you will be automatically signed out of Amadeus and any work in progress will be ignored. The connection to Selling Platform will still be active however in order to use Amadeus you will need to jump in.

The command JI your Amadeus Sign in code / duty code-password is entered.

JI0709EM/SU-PASSWORD	Sign to a single work area
JI*1310DH/SU-PASSWORD	Sign into all six work areas
JXC	Move to and sign into work area "C" when you are already signed into another area
JMA	Move to work area "A" when you have previously signed into this work area

Or click on the Graphical PNR tab

to display the sign in popup window.

#### **Work Areas**

**JD** will display the status of the work areas.

58610AE6	NBO1A0900	PSEUDO CITY: NBO
AREA TM	MOD SG/DT.LG TIME QCAT ACT.Q	STATUS NAME
C-IN	PRD AA/SU.EN 24 020	SIGNED
A-OUT	PRD AA/SU.EN 24 020	SIGNED
B-OUT	PRD AA/SU.EN 24 020	SIGNED
D		NOT SIGNED
E		NOT SIGNED
F		NOT SIGNED

Six work areas are associated with each terminal. They are identified with the letters 'A' through 'F' and appear on the left side of screen. Under status you can see if you are signed into an area or not.

This functionality allows you to have up to six reservations active on your terminal at one time, or for more than one person to be signed into a terminal at a time.

Sign Out HE JO

JO Sign Out of the work area you are currently in JO\* Sign out of the work area(s) you are currently in

# Smart Keys and Speed Mode | aMadeus

The Command Page has various tools to assist you to save time. These will be Demonstrated as we go through the course. Here is a brief overview.

#### **Smart Keys**

The purpose of Smart Keys is to help you enter frequently used or lengthy commands.

There are 3 main Tabs.

<ul><li>Public Smart Keys</li><li>Office Smart Keys</li></ul>	All Amadeus users have access Specific to your Amadeus office ID	
Specific to your sign in		
May 40   1000 (000) 60   500   501   50   500   501   502   500   502   503   503   503   503   503   503   503	SINC MALL OF LAW   MALL DIVI	

## **Public Smart Keys**

PAX		FOID	Enter Form of ID
7000000	Add passenger contact	read	
BE	Add Infant details	ITH	Print or email itinerary
ARM		ERC	·
DENIC	Add ARNK		Encode city/country/airline/car/hotel
Automotical Control of the Control o	Memo segment Car, Hotel, Air, misc	DEC	Decode city/country/airline/equip
101		cene	, , , , , ,
0.11%	Retrieve history options	MEAL	Convert Currency
SPIT	Retrieve PNR options		Display meal codes
2011	Split PNR	1177	Help after error message
103	Cancel Itinerary	SSR	SSR contact information
FOO	Cancer Iumorary	Din	
TKP	Fare quote display		Master Pricer Expert
100		REG	
TOT	Pricing with options	SAIL	Amadeus Information
DOCS	Display transitional stored ticket	8640	Enter Rail information
	Enter passport, visa or address		Add Secure Flight Passenger Data

## **Speed Mode**

Speed mode is indicated by colour. By double clicking on a coloured element number you can modify or update an element. This does not apply to the flight elements.

```
RP/NB01A0900/

1.FABRO/JOSE MR
2 QR1342 M 12SEP 6 NBODOH DK1
0130 0620 12SEP E 0 320 M
MANDATORY APIS REQUIRED
```

Or use your mouse to hover over text, when you see the question mark, right click with your mouse for more information or to decode.

## **Encode / Decode**

#### **HE CONVERT**

The following can be encoded or decoded using Smart Keys.

City / Airport	DAN LONDON	Encode the City London
	DAN LONDON/GB	Encode the city name London in country GB
	DAN NAPI*	Encode the city name starting with NAPI*
	DAN CHICAGO/N	Encode the city name and show 10 closest cities
	DAC OAK	Decode the IATA city/ airport code OAK
Country/State	DC BRAZIL	Encode the country Brazil
	DB EG	Decode the country code EG
	DNS CALIFORNIA	Encode the state California
	DNS CAON	Decode the code CA and state code ON
Airline	DNA KENYA AIRWAYS	Encode Kenya Airways
	DNA AF	Decode airline 2 letter code AF
	DNS 706	Decode airline numeric code 706
Equipment	DNE AIRBUS	Encode equipment AIRBUS
	DNE 777	Decode equipment code 777

## **System Help pages**

#### **HELP**

Amadeus provides online help, which gives examples of commands with an explanation.

By entering the word **HELP** you are automatically displayed the Introduction to Help page, where different help examples are given. All help commands begin with **HE**.

HELP	Helps on Help pages
HE CITY	Display help by Subject name
HE DAN	Display Help using the command identifier
HE/	Help on incorrect entries
HE ETT KQ	Electronic ticketing on Airline KQ

## **Scrolling Commands**

**HE SCROLL** 

The scrolling commands are used in information pages, help, availability, PNRs and fares screens when there is more than one screen of information to view.

MD or M	Move down to next screen
MD20	Move down 20 lines
MU or MU15	Move up to previous screen or move up 15 lines
MS102	Move to screen line 102
MT	Move to top
MB	Move to bottom
GP4 or GPBAG	Go to page 4 or page name BAG
MP	Redisplay a cleared screen

## **Amadeus Selling Platform Features**

#### **Command Recall**

Hold down the <u>ALT</u> key and then press the <u>A</u> Arrow Up key on your keyboard. You can scroll back through your previously used commands.

Hold down the **ALT** key and then press the Arrow Right key on your keyboard or click to display the previously sent command window

Highlight and click **Send** to input a Command **OR**Hold down the **CTRL** key (on your Keyboard) and use your mouse to select several previously sent commands.

Or use the **Pause** key on your keyboard to clear the current screen.

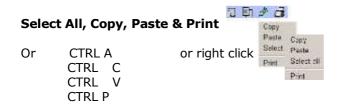

# Split Screen

The split screen facility allows you to work on a PNR in one section and use the other section to view information eq. help. Select the split screen icon and click again to anchor.

#### **Customization**

The screen colour and font style and size can be changed by selecting the Customization icon. You can select the Configuration tab in this window and select graphical displays and services.

## **How to Calculate Times and Dates**

You can make time and date calculations in the system using the **DD** entry.

The table below shows some examples of the types of information you can display:

#### **Time and Date Entries**

DD	Displays the current system time and date
DD MIA	Displays the current time and date in Miami
DD NBO/MIA	Display time difference between NBO and MIA
DD 25DEC	Displays the specific day of the week for a date

#### **Timatic**

Timatic is a third-party system that provides travel and health information.

You can access Timatic through Amadeus.

To request a fill-in template for health and visa information, enter:

#### **TIFA**

#### System Response:

```
>TIRA
NA
AR
EM
DE
TR
VT
NA-PASSENGER'S NATIONALITY. ADD /SEMN IN CASE OF SEAMAN
ADD /TYPE FOR OTHER THAN NORMAL PASSPORTS
AR-ALIEN RESIDENTS
EM-EMBARKATION POINT / TR-TRANSIT/TRANSFER POINT(S)
DE-DESTINATION POINT (S) / VT-COUNTRIES VISITED THE LAST 6 DAYS
(USE 3-LETTER CITY/AIRPORT CODE OR 2-LETTER ISO COUNTRY CODE)
```

Use the arrow keys to enter the information into the **NA**, **DE**, and **TR** fields. You can enter a maximum of ten airport codes, separated by a slash, in the **DE** and **TR** fields.

## **Carrier Information**

**GGAIR** 

GGAIR pages are used by carriers to inform you on marketing, operational and other airline related information.

All GGAIR pages are owned and maintained by the individual airline and are all formatted differently.

GGAIRKQ

Carrier information pages for KQ (Kenya Airways)

QATAR AIRWAYS....WORLD'S 5-STAR AIRLINE....

FOR ACCESSING INFORMATION ALPHABETICALLY PLEASE TYPE:
>GGAIRQR FOLLOWED BY THE FIRST LETTER OF YOUR TOPIC FOR EG.
>GGAIRQRA

## **Amadeus information System**

**HE AIS** 

GG AIS	Go Get Amadeus information pages index

# AmadeusITGrou

# **Module 2: Flight Itinerary**

## This module includes the following:

Timetable Display

Amadeus Neutral Availability

Participating Carrier Agreement GGPCA

Carrier Access Levels

**Availability Options** 

Carrier Preferred Availability

Direct Access Availability

Flight Operation Information

Ways to Sell Seats

Cancel

Change number of Seats, Class or Date

Non Homogeneous PNR

Surface Segments

Married Segments

Change Segment status

## **Timetable Display**

A Timetable display contains a list of flights that operate between two city pairs for a 7 day period from the date specified. Move from Timetable display to availability with **TCAN** 

TN 21DEC BJMDXB	Timetable display for specific date
TN21DECBJMDXB/AKQ	Timetable display for specific date and airline

## **Amadeus Neutral Availability**

**HE AN** 

Amadeus provides availability on more than 500 airlines.

Availability can be requested for 361 days in the future from the current date.

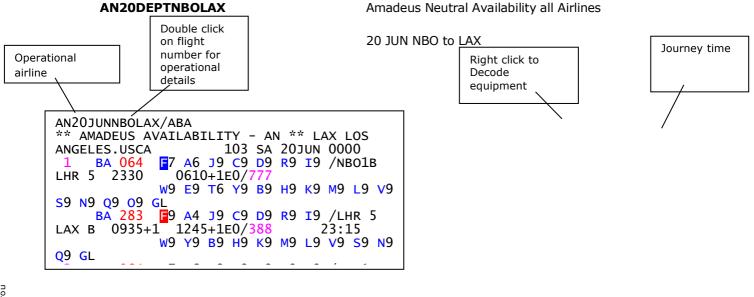

A neutral availability will return availability for flights departing up to 1 hour prior to the time requested or from midnight if no departure time was requested.

Flights will appear in the following order:

Non-stop flights

Flights with stops

Connecting flights and flights with change of equipment

©AmadeusITGr

Arrival day prior +1

No. of stops

Traffic
Restrictions

#### amadeus

Component **Identifies** Decode of Arrival City/Airport and two letter country code and state LAX LOS ANGELES.USCA 3 Number of days till departure SA 20JUN Two letter code for day of week and date SA = Saturday Departure time requested in your entry, defaults to midnight if no 0000 time was included in your request 1 Availability line number, this can be for 1 flight if a direct flight or multiple flights when connecting flights are displayed **BA 064** Two letter airline code and flight number AA: BA1679 (refer to line This indicates **BA1679** operates using a AA aircraft. 1) Code share can also be represented with \* (eg) \*AA **J9 D9 Z0 Y9 H9 K9 N9** Classes of service and availability status Blank Shuttle service. Number of stops Access Indicator (discussed later in this module) 777 Aircraft equipment type IR General Flight Irregularity code TR Traffic Restrictions apply 23:15 Journey time

# ©AmadeusITGr

## **Participating Carrier Access**

**GGPCA** 

For each airline that participates in Amadeus there is a Participating Carrier Access page. This page is a useful reference to determine an airline's 'Access Levels'.

Access Levels allow airlines to return current availability to Amadeus as well as offer a confirmed seat at time of sell. An airline may participate in one or more Access Levels.

This page will also display an airline's 'Function Levels' such as Ticket Number Transmission, Seat Maps and more.

**GGPCAKQ** 

Participating Carrier Access for KQ (Kenya Airways)

PARTICIPATING CARRIER ACCESS AND FUNCTION
LEVEL
KQ - KENYA AIRWAYS

ALTEA RESERVATION: YES
ACCESS INDICATOR: / RECORD
LOCATOR RETURN: ALL
LAST SEAT AVAIL INDIC: / CARRIER
PREFERRED DISP: ALL
STANDARD ACCESS: BOOKING
RANGE IN DAYS: 336

Generally where there is a value next to a field, the airline will support that function. However a blank space indicates the function is not supported.

The following fields all have values next to them indicating that they are supported.

RECORD LOCATOR RETURN: ALL E-TICKET NUMBER TRANSMISSION: ALL

amadeus.com

## **Airline Access Levels**

Airlines that allow the sale of seats through Amadeus establish communication links between their CRS (Central Reservation System) and Amadeus. These are referred to as Access Levels and allow airlines to offer different availability and sell options.

Indicator from AN Display	Access Level	Real Time Availability & Schedules	Real Time Sell	Status Code	Entry
blank	Standard Access	Х	Χ	SS	AN
	Access Sell	X	✓	НК	AN

	Direct Access	✓	✓	НК	1YY

#### amadeus

## **Availability Options**

**HE AN** 

To customise your availability display, you can add options to the availability entries.

**AN10DECBJMNBO1700** Available flights departing around a specific

**time.** Search will commence 1 hour prior to time specified. The time must always follow the

arrival city

AN23DECBJMDXB/AKQ Available flights for a specific airlines

Up to 6 airlines separated by a comma can be

requested. (eg) /KQ, EK, QR

AN22DECNBOAMS/A+KL Available flights for a specific airline, showing no

code share flights

AN24DECBJMNBO/CK, B, M Available flights for a specific booking class

Up to 3 classes separated by a comma can be

requested

AN11DECBJMNBO/KC Available flights by cabin type /KW

F First / C Business / W Premium Economy /Y

Economy + Premium / M Economy only

AN10DECNBOJFK/XZRH Available flights via specific connection point

(eg) flight via Zurich /XZRH

Seven Day Search.

When an Availability does not show the required fights/booking class. This search option is useful as it will search for the first available flight 7 days from the date in your initial command.

AN15DECNBOCAN/AKQ Search for First Available flight when there is not

a daily service between 2 cities.

AN/1JANNBOCAN/AKQ/CN Search for First Available flight specifying Airline

and Booking Class

#### **Carrier Preferred Availability**

Some airlines have a Carrier Preferred Display agreement with Amadeus. This display will show flights the airline has chosen to display for a specified city pair, such as its own flights or flights of partner airlines. The display can also show connections or routings that do not normally shown on a Neutral availability display due to the long lapsed flying times.

ANLX20DECLEDNBO Search for Carrier Preferred flight with

specified airline and/or partner airlines.

**ACLX/** To move from AN display to Carrier Preferred

## **Direct Access Availability**

#### 1TKAD12DECNBOIST

Direct access

From a neutral display, you may access the inventory system of that airline and view availability from their system. This is called Direct Access. Double click on the Airline code or highlight the airline code and double click

```
AN12JULNBOIST/ATK -MP-
** AMADEUS AVAILABILITY - AN ** IST
```

```
1TKAD12JULNBOIST

** TK - TURKISH AIRLINES **
```

Click on or to redisplay last Availability Neutral or Direct Access availability.

## **Availability Change / Return Availability**

**HE AC** 

After an initial availability has been requested, the availability can be updated by using the following change commands.

AC9FEB	Change date	
AC5	Change date to 5 days later	
AC-3	Change date to 3 days earlier	
AC1500	Change time to 1500	
MN	Move to next day	
MY	Move to yesterday	
ACR7	Change to return availability in 7 days	
ACR19JAN	Change to return for specific date	
ACR15FEB1300	Change to return availability specific date/ time	
AC/AQR	Change to airline Qatar Airways	
AC/CH	Change to H clas	

## **Flight Information**

**HE DO** 

Flight Information displays planned flight information for a specific flight number. Such as journey times, transit points, meal services, terminal information and aircraft configuration.

**DO4** 

Display Planned flight information for the flight/s on line 4 of an Amadeus Availability or segment 4 of a PNR.

Or You can **right click** on the **flight number** to display the first page of the Planned flight information, or

Double click on the flight number to get all pages of the planned flight information.

Double click on the

## **Waitlisting**

Selling from an availability status of  $\bf L$  or  $\bf 0$  will result in a Waitlisted segment ie  $\bf HL$  status. When the PNR is completed a message is sent to the airline requesting the passenger be placed on the waitlist.

**SS1B2/PE** Sell 1 seat in B class from line 2, wait list

priority E

SSKL566D1MAYNBOAMSPE1 Sell KL566 D class 01 May NBO to AMS,

# © AmadeusIT Grou

## **Dual City Pair Availability**

#### **HE DUAL**

Amadeus Availability allows you to request availability for a round trip. This is called a Dual City Pair Availability. After the forward availability command an asterisk \* followed by a date and/or city pair indicates a return or onward journey.

AN12DECBJMNBO\*4NOV AN17DECBJMNBO/AKQ/CY\*12JANNBODXB/CB **Dual City Pair** Availability for **return** journey **Dual City Pair** Availability for **onward** journey with carrier and class options

## **Sell from a Dual Availability Display**

SS1M1\*12

Sell 1 seat in M class for flight on line 1 of 1st city pair and line 12 of 2nd city pair

**OR** you can hold the CTRL key down, use your mouse to click on the classes to be booked and press enter. If you need more than one seat, use the short sell key. and enter.

## **Change Date and Time (Dual City Pair)**

AC12FEB1500*	Change date 1st City Pair
AC*15FEB1000	Change date and time 2 <sup>nd</sup> City Pair
MDF MUF	Move Down / Up on 1st city pair of dual availability
MNF MYF	Move Next Day / Yesterday on 1st city pair of availability
MDS MUS	Move Down / Up on 2 <sup>nd</sup> city pair of availability
MNS MYS	Move Next Day / Yesterday 2 <sup>nd</sup> city pair of availability

## **Passive Flight Segments**

**HE PK** 

Passive segments are flights booked and held in another system other than Amadeus. eg: booked with a wholesaler. Passive segments must be ticketed in Amadeus

SSEK720U15MAYNBODXBPK1/76ETU8

Passive segment UA84 M class SYDLAX 1 seat

with airline record locator. Short sell passive segment.

SS1Y1/PK/767EU8

If the airline does not support Passive Notify, see GGPCAxx, a segment can be removed using **DL**, this does not send a cancellation message to the airline. If the airline supports Passive Notify, passive segments can be cancelled using the **XE** or **XI** commands. This will generate a passive segment cancellation message to the airline.

## Non Homogeneous PNR (NHP)

**HE NHP** 

A non homogeneous (NHP) condition can occur when two or more segments in a PNR do not contain the same number of seats. You will need to change the number of seats by segment number prior to end of transaction.

\*\*\* NHP

#### RP/NBO1A0900/

1 BA 064 J 15MAY 5 NBOLHR HK2 5 2330 0610 16MAY E 0 777 M 2 BA 065 J 20MAY 1 LHRNBO HK1 1 1015 2045 16MAY E 0 744 M

## **Change Number of Seats**

When a segment is added to a PNR the number of seats held can be increased or decreased before end of transaction. This command can only be used for one segment at a time, not for a range of segments. Not all airlines accept this command.

6/3

IR

Change number of seats for segment 6 to 3

## **Ignore Transaction**

**HE IG** 

During PNR creation, the ignore command will remove any record of the PNR from the System. For a retrieved PNR, the ignore command will remove all entries since the PNR was last retrieved.

**IG** Ignore the current transaction

Ignore and retrieve (this can only be performed on

a PNR that has been previously ended)

Should an attempt be made to IR a PNR that has not be previously ended the response 'RESTRICTED - PNR NOT FINISHED' is returned. In this case IG should be entered.

ARMS

## **Surface Segment (ARNK)**

**HE SI** 

A Surface Segment otherwise known as an ARNK indicates one is travelling between two points by other means of transportation. Failure to include an ARNK will result in a warning at End Transaction, regarding segment continuity.

**WARNING: CHECK SEGMENT CONTINUITY - SEGMENT 3/4** 

SIARNK

Sell Information segment Arrival Unknown

## **Married Segments**

**HE MSC** 

In certain cases, airlines will offer a better level of availability on flight segments if these segments are sold as part of a connecting flight rather than as individual flight segments. Some flight segments may also be restricted for use as part of connecting flights only, due to a legal requirement concerning traffic restrictions.

When segments are sold together in this way, they are known as 'married segments'. If segments are 'married' in this way to other segments in the itinerary, it may not be possible for you to cancel, price or ticket this segment individually.

When a PNR contains 'married segments', a header tag **MSC** is displayed.

**RTIM** Display entire itinerary including married

segment indicators

RTA Display only married air segments

The married segments in this example are indicated by the  $\bf A$  followed by a number. Segments with the same number are married together.

If you attempt to cancel a segment that is married to other segments in the itinerary, the system performs a series of checks. If it is possible, the system cancels the segment as usual. If it is not possible, a warning message is issued. Response below after XE4 entry.

NOT ALLOWED : MARRIED SEGMENTS 4,5

# **Module 3: PNR**

## This module includes the following:

Passenger Name

**Contact Elements** 

Ticketing Time Limit / Auto Cancellation

Received From

**End Transaction** 

Combine PNR Elements

PNR Retrieval

A Passenger Name Record (PNR) contains the details of a passenger's reservation.

Items such as flights, passenger names, phone contacts are called elements. A PNR can contain a maximum of 999 elements. Elements can either be mandatory or optional. PNR elements can be added in any order. The system will prompt you if you exclude a mandatory field.

Mandatory Elements: 1. Name

2.Flight / Segment

3. Contact

4. Received From

5. Ticketing Time Limit

When a PNR is created, as Amadeus accepts each element, it is assigned a number and is placed in the correct sequence. All elements are numbered consecutively which makes modifications easier. Short cut retrieval commands using **RT** allow you to retrieve selected elements, eg RTN will retrieve the name element only.

PNRs will remain retrievable for three days after the date of the last active or inactive segment in the itinerary. Once a PNR is purged, you can retrieve it from up to three years in the past.

#### amadeus

Quick PNR HE PNR

After selling flights the PNR is completed by adding the other mandatory elements. These elements may be added in any order.

#### **Name Element**

The name element will accept a maximum 59 characters in one entry.

NM1 HAKIZIMANA/PAUL MR Single Adult passenger

**Contact Element**

**Ticketing Time Limit Element** 

**TKOK** No ticketing time limit set

**TKTL23MAR** Set Ticket Time Limit as 23 March (will go onto

the ticket queue at midnight on 22 March local

time of your office)

**Received From Element** 

**RF MRS MORRIS BY EMAIL** Add Received From as Mrs Morris. Free text

field. This is recorded in the PNR history

**End Transaction** 

**ER** End Transaction and Retrieve

**ET** End Transaction

NOTE: Please take care if you override a warning message

**Retrieve PNR** 

RTX86X9C Retrieve PNR using the Amadeus Record

Locator

**RT/SMITH** Retrieve PNR using the Passenger Family

Name

RT3 Retrieve the 3<sup>rd</sup> PNR from a Similar Name List

#### **Adult Name Element**

NM1HAKIZA/JEAN MR Single adult passenger

NM1BIZIMANA/BOB MR1PAUL/BEATRICE MRS Multiple adult passenger different surname

NM2SMITH/BOB/HELLEN MRS Multiple adult passenger same surname

#### **Child and Infant Name Element**

Child name elements are entered as individual passengers. When entering a Child, the Passenger Type Code and the Date of Birth must be added after the title for PNR pricing purposes. As an infant does not require a seat, the Passenger Type Code, Infant name and Date of Birth must be added to the end of the accompanying Adult title.

NM1WATSON/MARD MSTR (CHD/16NOV08) - Child with pricing indicator and date of birth

NM1LONG/MAY MRS (INF/LISA/16NOV08) - Adult with an infant with same family name

**NM1LONG/ANNE MRS (INFWAN/KIM/08DEC14)** - Adult with an infant with different name to the accompanying adult

## **Family Booking**

NM3SMITH/BOB MR/HELLEN MRS (INF/JOY/12DEC14)/JOEL (CHD/16NOV08)

The above commands will generate an automatic **SSR CHLD** and **SSR INFT** to each airline in the PNR itinerary. As these SSRs are system generated, they cannot be cancelled using XE.

Requests for child and infant passengers (Child Meal, Infant Meal and Bassinet) are generated using an SSR (Special Service Request). The SSR will generate to all HK segments for all airlines that provide such services. HN and HL segments with not be processed.

**SRCHML/P2** Request a child meal (CHML) for passenger 2,

all confirmed segments.

**SRBBML/P1** Request a baby meal (BBML) for the infant

associated to passenger 1

**SRBSCT/P1** Request a Bassinet (BSCT) for the infant

associated to passenger 1

#### **Add Child and Infant Details**

Should child or infant details be left off a name element, these can be added rather than cancelling and re-entering the name with the correct details.

3/(CHD/09JUN06) 1/(INF/OSCAR/12JAN14) 1/ Add CHD and date of birth to passenger 3 Add INF and date of birth to Adult passenger 1 Remove Child or Infant association from passenger 1

## **Ticket Element Options**

**HE TK** 

The ticketing element is used in a PNR to:

- 1. Set a ticketing time limit to issue ticket(s) on a specified date.
  - 2. Set an auto cancellation. The PNR is automatically cancelled by the system if not ticketed by the specified date and time.
  - 3. Indicate that tickets have been issued.

#### **Ticketed**

**TKOK** PNR ticketed on creation of PNR. PNR will not

appear on ticketing Queue.

**Ticket Deadline** 

**TKTL12MAR** Set a ticket deadline of 12 Mar (will go into

ticket queue 12 midnight 11 Mar)

**TKTL5JUL/1800** Set a ticket deadline of 5 Jul at 6pm (handy

for night shift staff)

**Auto Cancellation** 

**TKXL19AUG** Set an auto-cancellation for 19 Aug at 12

midnight

**TKXL1APR/1700** Set an auto-cancellation for 1 Apr at 5pm

## **Regenerating Contact Elements**

HE AP

The **AP** command is used to generate the contact number to the airlines in the PNR. This generates once only at the end of transaction following its addition to the PNR.

```
Contact types: \mathbf{H} = \text{Home}, \mathbf{B} = \text{Business}, \mathbf{M} = \text{Mobile Phone}. \mathbf{A} = \text{Agency}
```

Phone contacts added as **AP** elements only generate once. Therefore on a retrieved PNR when a **new** airline is added contacts must be regenerated.

Double click on

```
--- RLR ---
RP/NB01A0980/NB01A0980 GI/SU
9MAR15/1324Z 2P7S2F
NB01A0980/2222GI/9MAR15
L/WOODVALE/JOHN MR
2 BA 064 M 10JUN 3 NBOLHR HK1 2315
0555 11JUN E BA/
```

Or you can add the contacts as an OSI.

## **Combining Elements**

PNR elements can be combined together in one command by using the (; ) semicolon.

For example a received from and end transaction and return to booking. RFMR SMITH; ER

Or you add a number of elements. Only the element/s with formatting errors will be rejected.

NM1 BIZIMANA/GEORGE MR; AP BJM 22 22 23 24-H; TKOK; RFPAX; ER

Many airlines offer Frequent Flyer programs to passengers. In Amadeus you add these to a PNR using the frequent flyer formats which will generate as an SSR FQTV (frequent flyer). The Associated Airline Frequent Flyer Tables allow you to display the FF agreements that exist between airlines. (Not all airlines participate in this functionality)

-

## **Altéa® Reservation Airlines**

**FFAKL-1234567** Create the Name Element and SSR FQTV for a

KLM Frequent Flyer (will generate an SSR with the frequent flyer number to other One World

participants in the PNR)

**FFDOR-1234567** Display the member name from the Frequent

Flyer Number

**FFNAF-123456789** Insert name and Number ( for all airlines) **FFNAF-123456678, KQ** Send to partner airlines ( for all airlines)

SR FQTV KQ - AF12345678 Name mismatch (for all airlines)

## **Ticket Number Transmission**

HE FH

Amadeus has the ability to generate ticket numbers in the specified format to an airline that participate in ticket number transmission.

Refer to **GGPCAXX** xx - airline code

At end transaction the ticket number is generated as either an OSI or SSR depending upon what the airline requires.

FHE706-4512001923/P2 Add FH fare element for passenger two in a PNR

to generate on all flight segments. (The check

digit is optional).

FHE086-3312445123-124/P1 Add FH fare element for passenger one in a PNR

for conjunction tickets to generate on all flight

segments. (The check digit is optional).

Seat Map HE SM

Airlines also offer the facility to display a map of available seats on an aircraft and request the required seat number from the map. This is known as an Interactive Seat Map. The participating carrier agreement page will indicate if you can display a seat map eg **GGPCAXX** (xx = airline code). **Note, some airlines charge a fee for ancillary services eg. selecting specific seats.** 

Select a seat

Click on required seat and then on

6 /SSR RQST KL HK1 NBOAMS/65JN,P1/S2 SEE RTSTR

The / in front of the KLM SSR service element indicates a chargeable service.

**FXG** Price pre-selected seat (SSR element) and save pricing as TSM

passengers on segments 3 and 5

## **Module 8: PNR Modification**

## This module includes the following topics:

Cancel elements

Change booking class

Reduce Number in Party

Change segment status

Name Modifications

Copy PNR

Split PNR

Cancel HE XE

To cancel a flight, passenger or element that is not required the **XE** (cancel element) command is used. To cancel multiple elements, list them in ascending order.

When cancelling a passenger, the number of seats are reduced and all elements associated to that passenger are cancelled.

After a name cancellation, you cannot make any further entries to the PNR apart from the Received From and End of Transaction.

You must keep at least one name in the PNR, otherwise you will receive the error message \*NEED NAME\*.

XE3
Cancel element 3
Cancel elements four through six
Cancel elements three and five
Cancel Itinerary (this can only be performed on a PNR that has been previously ended)

## **Change Booking Class / Date**

**HE SB** 

It is possible to cancel and re-book existing flight segments in a PNR. These commands are referred to as 'Should Be' due to the command identifier being SB.

SBY	Re-book entire itinerary in 'Y' class
SBC4	Re-book segment 4 to 'C' class
SBJ3/C6	Re-book segment 3 to 'J' class and 6 to 'C' class
SB19JUN	Re-book entire itinerary to 19 June
SB23DEC4/14JAN5	Re-book segment 4 to 23 December and seg 5 to 14 Jan
SBF19DEC4	Re-book segment 4 to 19 December in 'F' class

The SB entry cancels the existing segment(s) and resells to the new class / date. If there is no availability, the flights are not cancelled and an Amadeus Availability is displayed so an alternate flight can be sold. If there are SSR MEAL requests with a status of NN, HN, KK, or HK the requests are automatically rebooked. When this occurs the following response is received.

#### ASSOCIATED SSR MEALS REMOVED - ALL MEALS REBOOKED

All other SSRs and SEATING will need to be manually regenerated.

**Note:** The SB entry sends a cancel and rebook message in one entry to the airline. Some airlines do not accept cancel/rebook messages made in the same entry. They require that you cancel in one entry, receive from and end the PNR, and then rebook. If you are unsure please check directly with the airline.

# **Reduce Number of Passengers in PNR**

By cancelling a name element on a retrieved PNR the number of seats is reduced as well as cancelling all associated elements. (eg) meals, seat requests, etc.

In the following PNR, Mr Smith will no longer be travelling. **XE2** will remove him from the PNR

RP/NB01A0900/NB01A0900 GI/SU 15JUN15/1311Z YSXN6M NB01A0900/2222GI/15JUN15

After a name cancellation, you cannot make any further entries on the PNR apart from the Received From and End of Transaction.

You must keep at least one name in the PNR, otherwise you will receive the error message \*NEED NAME\*.

## **Change Segment Status**

When the status of a PNR segment or SSR element is changed due to an advice received from an airline. The status can be updated by specifying the individual element or using the end transaction option to update all elements.

7/HK Change element 7 to HK

ETK End Transaction on PNR and update status codes
ERK End and Retrieve PNR and update status codes

ENTRY	WHAT DOES IT DO?	ACTION REQUIRED
KL	Confirming from waitlist	Change to HK
KK	Airline confirming request	Change to HK
TK	Schedule change confirmed segment	Change to HK
TL	Schedule change waitlist	Change to HL
US	Sold out have waitlisted	Change to HL
UU	Sold out airline have waitlisted	Change to HL
НХ	Was confirmed , now cancelled	Segments to be removed from PNR
UN	Unable, flight not operating	Delete from itinerary
NO	No action Taken	See GG CODE N

Refer to GG CODE x (x - first letter of code) for a list of Travel Industry codes

## **Name Modification**

**HE NU** 

Functionality for modifying a name on a retrieved PNR exists, however you must be aware of the name change policy of the airlines in your PNR before using this functionality.

Contact the airlines in the PNR to obtain authorisation to modify a name. If this is not done the airline may automatically cancel the reservation in its own CRS.

NU2
Name update
Name element 2
Mandatory slash
PETERS/KAREN MS
Updated name information

NU2/1CHAMBERS/ROBERT MR	Update passenger 2 in a PNR updating the Family name and Given Name and Title, retaining element association and passenger type codes e.g VGML, CHD, INF
NU3/JULIEANNE MISS	Update passenger 3 in a PNR updating the Given name and Title, retaining element associations and passenger type codes

Copy PNR HE RR

Copy PNR allows you to copy the data in a retrieved PNR to create a new PNR. The copy process will automatically ignore the displayed PNR, creating the copied PNR which will appear with the prompt of REPLICATED PNR.

When the PNR is duplicated a sell message is automatically generated. Subject to the class being available the flights will be confirmed.

RRI	Copy the itinerary from a display PNR into a new PNR	
RRI/5	As above, changing the number of seats to 5	
RRN	Copy itinerary and all non passenger related information from a displayed PNR into a new PNR	
RRN/4	Copy as above booking 4 seats to 4	
RRA	Copy itinerary and create Associate Cross Reference AXR	

#### amadeus

Split PNR HE SPLIT HE SP

PNR is split when one or more of the passengers wishes to make a change from the rest of the party. The split is performed using the **SP** command. Once this is entered, a process must be followed to complete the Split PNR. The process can be ignored at any stage prior to EOT.

<u>Note:</u> Make sure all Status Codes are updated prior to the Split. If any error messages are received during the split process it will not complete correctly.

- RT/WOODVALE (by name) or RTZFRGCY (by record locator)
   Retrieve the PNR
- 2. **SP2** or **SP1,3** Split the passenger/s making the change

The split passenger appears on your screen in the Associated PNR which will not have a record locator assigned until the Split is completed.

- 3. RF JOHN PASSENGER
- 4. **EF** File the Split PNR

The original PNR (parent PNR) is displayed with the remaining passengers.

- 5. RF JOHN PASSENGER
- 6. **ET** End Transaction

Your PNR is now Split. Retrieve the split PNRs and check that relocs have been returned from the airlines. **RL** 

- 7. Make necessary the changes to the Split PNR.
- 8. Add an OSI with the TCP (Total Complete Party details with common flights to both PNRs

# **Module 7: Queues**

## The module includes the following topics:

Queue Count

Queue Start

Action Queues

Manual Queue Placement

## **Queues**

Each travel agency is automatically assigned predefined queues. In addition to the predefined queues, you can add queues to which you can manually move PNRs.

## **Predefined Queues**

Queue Number	Queue Name	
0	General	not attached to a queue category
1	Confirmation	
2	Confirmation from waitlist	
3	Options	
7	Schedule change	
8	Ticket Time limit	
12	Expired Time limit	
97	Message	not attached to a queue category

## **Queue Count Associated**

**HE QT** 

**QCA** 

Queue Count queues Associated to your queue category.

<u>Queue category</u> – A queue category number can be attached to a consultant sign on. You can view your Consultant Queue Category number by using the JD command. The number appears under **QCAT** 

```
1742 15JUN
QUEUE....NBO412214.....Q/
TTL...ADDS...LQC...IW
```

## **Queue count Total**

QΤ

Queue Table for queues that have PNRs or messages for actioning for all consultants and all queues.

```
1742 15JUN
QUEUE....NBO412214.....Q/T
TL...ADDS...LQC...IW
Q 1.CONFO
```

#### **Date Ranges**

Some queues can also be divided into 4 date ranges to prioritise where there are large volumes.

Date Range	Date Covered	Example(assuming today is 1SEP)
D1	Today plus two days	01SEP - 03SEP
D2	Three to five days, from the current date	04SEP - 06SEP
D3	Six to eight days, from the current date	07SEP - 09SEP
D4	Nine days and beyond, from current date	10SEP onwards

PNRs are placed into date ranges based upon the departure date of the first segment in the PNR. Amadeus will automatically move a PNR from one date range to the next if the PNR has not been actioned and then falls into the next date range.

The use of date ranges allows to you action the most urgent PNRs first.

Queue Start HE QS

Once you have determined that items are on queue to be actioned. The queue must be started which takes you into queue mode.

**QS0** Queue Start queue 0

**QS1C30** Queue Start queue 1 Category 30.

**QS1C30D1** Queue Start queue 1 Category 30 Date Range 1

## **Queue Actions**

## **HE QUEUES**

When a queue is started the first PNR in the queue will display. Action must be taken on the PNR in order to see the next PNR. When you get to the last PNR in the queue the message "Queue Cycle Complete" will appear.

QN	Removes the current PNR from the queue with no action being taken. The next PNR in the queue will display
QD	Moves the PNR to the end of the queue delaying it to view at a later time. If there are more PNRs in the queue the next PNR will display.
QI	Ignore the current PNR placing it at the top of the queue and exit queue mode.
ET	Updates the PNR with changes made removing it from queue. If there are more PNRs in the queue the next PNR will display.
ETK	Updates the status codes in a PNR and will remove the PNR from Queue.

"QUEUE EMPTY" is returned when you have actioned all PNRs in the queue.

## **Manual Queue Placement**

HE QE

A PNR can be manually placed onto a specific queue in your office or another Amadeus location.

**ES/G** office id – **B** - Extend PNR security to another office

**QE/office ID/ queue no** – Queue booking to another office

# **Module 8: Itinerary Options**

## The module includes the following topic

Display/Print Itinerary

Print PNR

**Email Itinerary** 

Check my trip Itinerary

IED	Display Itinerary to your screen
IEP	Print Itinerary, one copy per passenger
IEPJ	Print Itinerary, one copy for PNR

Print PNR HE WRA

Part or all of a PNR can be printed including the history.

WRA/RT

Print entire PNR that is currently retrieved

## **Email PNR Itinerary**

**HE EML** 

The itinerary in the PNR can be sent to the email address stored in the APE element of the PNR.

IEPJ-EML-email@address.com	No email address in PNR
IEPJ-EMLA	APE element in PNR

The response will be **'ITINERARY EMAIL SENT - NUMBER SENT 1'**.

## **Online Itinerary for Travellers (check my trip)**

Your clients are able to check their Amadeus bookings online via **checkmytrip.com**They will need their Amadeus Record Locator and Surname before clicking on the arrow.
This application can be down loaded to a mobile phone and other applications.

# AmadeusITGrou

# **Module 8: Fare Quote Display & PNR Pricing**

## This module includes the following:

Introduction to Fare Quote Display

Best buy

Price PNR

Display Fares Stored in a PNR

Delete Fares Stored in a PNR

Display Historical Fares Stored in a PNR

Select a Fare from a List to Store in a PNR

Master Pricer Expert

# **Introduction to Fare Quote Display**

# **HE FQD**

The basic Fare Quote Display allows you to display airfares between two cities from the lowest to highest fares for any airline that has fares filed for the city pair.

FQDBJMDXB/17OCT/AKQ	Fare Quote Display NBODXB departing 17 OCT on Kenya Airways
FQDBJMDXB/10JUN/A xx	FQD followed by the city pair, date and specific airline option
FQD NBODXB/D16SEP/AKQ, EK	Basic entry to date and Airline (max 3 airlines)
FQD NBOJNB/D16SEP/AKQ	Fares from Low to High on a specific Airline
FQD BJMNBO/D16SEP/IX, R	Display Return fares low to high
FQDBJMNBO/D16SEP/IX, O	Display one way fares low to high
FQD NBO CDG/D16SEP/S	Shoppers display
FQD NBOMBA/D16SEP/IR/AKQ/R,AT	Display return fares on specific airline including taxes
FQD NBOJNB/ASA/R,-CNN-IN	Display fares for child and infant (*FQL – to view PTC)
FQDNBOJFK/AKL/IX/R, U	Display negotiated fares
FQD NBOJFK/AEK/R,U12345	Display negotiated fare corporate fare.
FQDNBOJFK/AKL/IX, R/KC	Display return fares in business class low to high F=first C= business Y=Economy
FQDNBOBKK/AKQ/IR/D20FEB15 /R,11JAN15	Display past date fare, must specify year and airline ( D = Travel date R = Ticketing date)
FQD NBONBO/AKL/VRW	Display round - the - world fares on specific carrier

## **Fare Notes**

FQN1*L or FQN1//L	Display Fare Notes index
FQN1*MN, SO or FQN1//MN,SO	Display specific paragraphs of Fare Notes Notes (line 1)
FQR 3	Display Route Information
FRC 2	Convert line 2 to ZAR (default to Office ID currency)
FQS 1	Display the booking classes applicable for a routing fare
FQK 1	Display the tax breakdown for the fare on line 3 of fare display
MPFQD	Move to previous Fare Quote Display
MPFQN	Move to previous Fare Quote Notes
FQNTAX/KE	Tax information for specific country ( can use country name)

# **Currency Conversion**

FQB KES	All Bank Selling Rates (BSR) against KES (updated every Wednesday morning)
FQC 100USD/KES	Convert specified amount into KES
FQC 100 USD/KES/110CT14	Historical BSR – specify year

## Rebook best available fare

## **HE FXB**

**FXB** Rebook best available fare for the flights held.

This is a cancellation and re-sell and may

affect associated SSRs.

**FXR** Prices an itinerary and automatically rebook the itinerary with the lowest

available fare, **BUT DOES NOT CREATE TST!** 

(Possible without names in PNR!

## Price as booked

**HE FXP** 

**FXP** is the basic pricing command and assumes:

All segments and all passengers are to be priced

All passengers will be priced as adults unless a Passenger Type Code has been associated to a passenger (e.g) Child or Infant

**FXP** Price Itinerary and create a TST (Transitional Stored Ticket).

When there is only one passenger in the PNR and there is only one fare applicable to the itinerary and booking class, a fare image will automatically display.

FXP/R,FC-USD
01 JOHNSON/HEIDI*

1-2 LAST TKT DTE 30MAY14 - SEE ADV PURCHASE

1-2 TICKETS ARE NON-REFUNDABLE

## **Display the Fare Image**

FQQ1

Display the fare image for passenger 1 in a multiple passenger PNR.

AmadeiicTTGro

## Select a Fare from a List

**HE FXT** 

On occasions when you price a PNR, there may be more than one fare filed by an airline in the booking class you are holding. In this case a list of fares is returned so you can choose which fare you wish to store for the itinerary.

```
FXP

* FARE BASIS * DISC* PSGR * FARE<AUD> *
MSG*T
```

The response lists three fares that are eligible. To select the fare required the **FXT** command is used. Alternatively you can double click on the line number.

FXT2 FXT1/P3 FXT3/P1-2//4/P3 Select the fare on line 2 and create a TST Select the fare on 1 for passenger 3 Select the fare on line 3 for passengers 1 and 2, and the fare on line 4 for passenger 3

## List of lower available fares

**HE FXA** 

You can obtain a list of lower available fares for the itinerary booked. When you select a line, your itinerary will be rebooked into the class required.

```
FXA
* FARE BASIS * DISC
```

FXA FXU4 Display a list of lower available fares Select fare on line 4

You can also select the fare by double clicking on the line number.

On a retrieved PNR the prompt --- TST --- (Transitional Stored Ticket) appears at the top of the PNR to indicate that either current, deleted or expired TST's are present.

Transitional Stored Tickets are displayed using the **TQT** commands. the Transitional stored **t**icket)

/

--- TST RLR --RP/NB01A0980/NB01A0980
GI/SU 3APR15/1933Z 3Y99V4

2 O INP SA 180 W 20OCT 1540 OK WRTS

Delete a TST HE TTE

Once you have priced flight segments in a PNR and stored a TST, should amendments be made to ALL flights in the PNR, the TST is automatically deleted. After entering TQT, the following response will be displayed:

#### 'NO ACTIVE TST - DELETED TST RECORDS MAY EXIST - PLEASE USE TTH'

If only some of the flights are amended, the TST is retained but the affected flights are deleted from the TST.

**A TST is valid for 12 hours**. If it has exceeded the 12 hour validity you must delete the TST and re-price. Or if your itinerary has been changed you will also need to delete and reprice. Any repricing will result in new TST numbers

#### **Overlapping TSTs**

If a flight is already included in a TST and you attempt to re-price it, the following response will be returned.

## 'PREVIOUS TST EXISTS/SEGMENT OVERLAP'

The TST must be deleted before a new pricing command can be performed on these flight segments.

TTE/ALL Delete ALL TSTs in a PNR

TTE/T2 Delete TST 2 only when there are multiple

TSTs stored

TTE Delete TST when there is only one to delete

When you have multiple TSTs in a PNR it is advisable to view the TST list by using the TQT command first then use the delete commands.

## **Display a Historical TST**

HE TTH

TTH Display deleted (historical) TST

TTH/ALL Display a current and deleted (historical) TST

index

Combination RCH, NBO. JNB, FC-USD

PTC / PTA and fare currency

## **Master Pricer Expert**

**HE FXD** 

You can use the FXD command to display lower fares for a destination with or without a PNR

With a PNR

**FXD** Displays the lowest fare for the itinerary held and

offers available alternatives.

**FXD//KW** Search and display recommendations for cabin

preference, premium economy (W)

For other options, refer to HE FXD. Following FXD, the display lists the best available fare for the current PNR and also returns available alternatives with other airlines. Each set of recommendations in the same group shares the same price, tax, fare basis and booking code.

#### **Select a Fare Recommendation**

FXZ1 Select best available for current PNR & rebook (no

TST)

**FXU1** Rebook best available for current PNR and create a

TST

**FXS2** Display the fare recommendations from group 2

MPFXD Move Previous FXD list

#### Without a PNR, requesting 2 seats

#### FXD2NBO/D12NOVDXB/D20NOVNBO

Follow the prompts at the bottom of the recommendations displayed. The default display shows only recommendation one in each group. The fares in each group will be the same fare basis with possible departures. Price for two adults is the figure in brackets. Fares are inclusive of Taxes.

#### **Select a Fare Recommendation**

**FXS2** Display the fares recommendations from

group 2

**FXZ1** Rebook recommendation 1 from displayed

group (no TST)

**FXU1** Rebook recommendation 1 from displayed

group and create a TST

## **Module 9: Issuing Ticket**

## The module includes the following topic

Issue ticket

Display E-ticket

Void / Refund E-ticket

Sales reports

## **Issuing Tickets**

Follow these steps to issue a ticket from a single-passenger PNR:

- 1. Retrieve the PNR
- 2. Price the itinerary. **FXP or FXB** (The validating carrier element (**FV**) is created automatically.)
- 3. Enter the form of payment. **FP CASH**
- 4. Enter a commission amount (optional). FM 1
- 5. Issue the ticket. TTP

When the ticket is issued, the ticketing system updates the PNR and creates an **FA** element with the ticket number and the ticket amount. The system creates one **FA** element for each passenger. The system also creates a unique 10-digit sequence number for each TST. This number is stored in an **FB** element and is called the Amadeus Interface Record (A.I.R.) sequence number.

Here is an example of a PNR that has been ticketed and shows the FB and FA elements

```
-- TST RLR ---
RP/NB01A0900/NB01A0900
GI/SU 4APR15/1423Z YOFZTI
NB01A0900/2222GI/4APR15
1.SMITH/PAUL MR 2.SMITH/HELLEN
